

Doctor Discussion Guide

Your doctor is your best source of information about acne and its treatment. By planning for the appointment beforehand, you can be sure to get the most from your doctor visit. Take time to think about any questions you may have before you go. We've created a Doctor Discussion Guide to help you get started.

The Doctor Discussion Guide includes some suggestions for questions to ask and information to share with your doctor. Complete this guide to help you think about topics you may want to discuss. Use the space provided to write any additional questions or information you want to talk about, and be sure to take it with you to your next appointment.

To learn more about acne

ASK

- Why do I have acne?
- How should I care for my skin?
- What should I look for (and avoid) in skin- and hair-care products?

SHARE

- How long you have had acne, including the frequency and location of breakouts
- Your skin-care routine, including any products you are currently using
- Any family history of acne

To learn more about whether FABIOR Foam is right for you

ASK

- How does FABIOR Foam work?
- How do I apply FABIOR Foam?
- How soon can I expect to see results?
- What are the most common side effects of FABIOR Foam?
- What should I do if I experience side effects?

SHARE

- Any treatments you have tried in the past and how well they worked for you
- Any concerns about your ability to follow a regular treatment schedule
- If you are pregnant or plan to become pregnant. Pregnant women should not use FABIOR Foam

Write any additional questions you have or topics you want to discuss in the space provided.

Indication

FABIOR Foam is a retinoid indicated for the topical treatment of acne vulgaris in patients 12 years of age or older.

IMPORTANT SAFETY INFORMATION

Do not use FABIOR Foam if you are pregnant or plan to become pregnant. FABIOR Foam may harm your unborn baby.

If you are a female who can become pregnant:

- Use an effective method of birth control during treatment with FABIOR Foam. Talk with your doctor about birth control methods that are right for you
- Your doctor should do a blood or urine pregnancy test within 2 weeks before you begin to use FABIOR Foam to be sure you are not pregnant
- If you have menstrual periods, begin using FABIOR Foam during a normal menstrual period to help assure that you are not pregnant when you begin use
- Stop using FABIOR Foam and call your doctor right away if you become pregnant during treatment with FABIOR Foam

Before you use FABIOR Foam, tell your doctor if you:

- or a family member have or had skin cancer
- have eczema
- have had a reaction to topical products in the past
- have any condition that makes your skin sensitive to natural or artificial sunlight
- must spend a lot of time in the sun for your job
- have any other medical conditions
- are pregnant or plan to become pregnant
- are breastfeeding or plan to breastfeed. It is not known if tazarotene passes into your breast milk. You and your doctor should decide if you will use FABIOR Foam or breastfeed. You should not do both

Tell your doctor about all the medicines you take including prescription and non-prescription medicines, vitamins, and herbal supplements. Especially tell your doctor if you use other medicines or products that make your skin dry or take other medicines that may increase your sensitivity to natural or artificial sunlight.

Use FABIOR Foam exactly as your doctor tells you to. Do not use more FABIOR Foam than prescribed and do not use it more often than your doctor tells you to.

FABIOR Foam is flammable. Avoid fire, flame, and smoking during and after you apply FABIOR Foam.

The most common side effects of FABIOR Foam are burning or stinging, dry skin, red skin, or peeling or flaking skin. Sometimes these symptoms can become severe and may be uncomfortable. Your doctor will tell you to stop using FABIOR Foam until your skin heals and your symptoms improve, or to use FABIOR Foam less often to help you tolerate it better. Tell your doctor if these side effects become uncomfortable for you. These are not all the possible side effects of FABIOR Foam. For more information, ask your doctor or pharmacist.

Medical Information & Adverse Events Reporting
